16. **ROUND ROBIN TIE BREAKERS**

Division standings will be determined by two points for a win and one for a tie; in the case of a tie between two teams in group standings, the higher position will be determined as follows:

Two Teams Tied:

1. The winner of the round robin game or qualifying round between the two tied teams gains the higher position (head-to-head). If teams are still tied, 2 applies.
2. The team with the most wins in the round robin or qualifying round gains the higher position.
3. If the two teams are still tied after 1 and 2 has been applied, then the team with the best goal differential gains the higher position. The goal differential of a team is to be determined in the following manner:
 - a. Total number of goals for divided by the total number of goals for plus total number of goals against.

NOTE: All round robin games or qualifying round games are included.

NOTE: The higher goal differential value gains the higher position.

4. If the two teams are still tied after 1, 2 and 3 has been applied, the team with the least number of penalty minutes **throughout all of the round robin games or qualifying round** gains the higher position.
5. If the two teams are still tied after 4 has been applied, then the team which scored the first goal in the game between the tied teams gains the higher position.
6. If the two teams are still tied after 5 has been applied, a single coin toss will determine which team gains the higher position.

Three or More Teams Tied:

7. When three or more teams are tied, the three or more team's tiebreaker is used to determine the seeding of the 1st, 2nd, 3rd etc. seed. If any step in the tiebreaker only seeds one team, that team assumes that position. The three-team or more tie breaker will continue to determine the seeding of the remaining teams. At no time will teams using this formula go back to the two-team tiebreaker.
8. If three teams or more are tied, the point record established among the tied teams only [using only the results of games played amongst the tied teams] will be used as the first tie breaking formula in deciding which team(s) shall advance. The team with the most wins (among the tied teams) would gain the highest position.
9. If the teams are still tied after 8 has been applied, then the team with the best goal differential, including the games that were excluded in 8 gains the highest position. The goal differential of a team is to be determined in the following manner: Total number of goals for divided by the total number of goals for plus total number of goals against.

NOTE: All round robin games or qualifying games are included. The higher goal differential value gains the higher position.

10. The exercise of 8 establishes the team or teams with the highest position(s) by percentage. These teams will advance. If there are still teams tied, then 9 is applied. They do not go back to the "Two Team Tiebreaker".
11. If the teams are still tied after 9 has been applied, the team with the least number of penalty minutes throughout all the round robin games will gain the higher standing.
12. If teams are still tied after 11 has been applied, a coin toss shall determine the higher standing. In a 3-team coin toss, the odd team gains the higher position, and another coin toss will be held to determine the standing of the other two teams.
17. For determining Semi Final and Final Game participation: a) In all divisions, 1st plays 4th and 2nd plays 3rd in Semi's - winners proceed to the Finals; b) In five team divisions, after 4 game RR, the top 2 teams proceed to the Finals.
18. The Semi Final games will be 12-12-12 with the same overtime as the Championship games detailed in #19.
